Education

FPT Polytechnic College Hanoi

B.S. in Software Applications – Information Technology

8/2017 – 6/2020

Hanoi, Vietnam

Work Experience

AI Fullstack Developer | Freelance / Self-employed

1/2025 – Present

Independent consultant delivering AI-integrated web applications for clients across Vietnam

Hanoi, Vietnam

- Designed and shipped 3+ client-facing AI products integrating OpenAI GPT-4 API (chat, summarization, Q&A automation), reducing manual workload by up to 60% per client workflow.
- Built full-stack web applications using Next.js and Node.js/Spring Boot, with REST API integration, achieving <2s page load times and mobile-first responsive layouts.
- Collaborated directly with clients to define AI/UX requirements and iterated rapidly based on feedback, cutting average delivery cycles from 4 weeks to ~2.5 weeks.
- Implemented prompt engineering strategies and function-calling pipelines with OpenAI API, improving AI output accuracy and relevance by 35% compared to baseline prompts.

Full-stack Developer | Taskcover

5/2023 – 3/2025

AI-powered real-time task & team management SaaS platform — app.taskcover.com

Hanoi, Vietnam

- Designed a distributed microservice architecture using Node.js, Python, Redis, and MongoDB, enabling real-time task collaboration for 1,000+ concurrent users via WebSocket.
 - Engineered async processing queues that decoupled heavy background jobs from user-facing APIs, reducing p99 response latency by 30%.
- Built and maintained robust CI/CD pipelines with Docker and container orchestration, achieving 99.9% system uptime across 22+ months in production.
- Owned performance optimization across the stack: Redis caching strategies, MongoDB index tuning, and connection pooling reduced DB read load by ~45% under peak traffic.

Full-stack Developer | FUNIX JSC

2022 – 2024

Leading Vietnamese ed-tech company — funix.edu.vn

Hanoi, Vietnam

- Developed and optimized backend APIs and PL/SQL procedures for FUNIX LMS on a Python/Odoo/PostgreSQL stack, serving 20,000+ active learners with 25% faster API response times via query tuning and data-model refactoring.
- Built Lifetek, a secure government cloud document platform processing 1M+ documents/month: implemented digital signature workflows, document versioning, and auto-destruction policies; applied sharding and indexing to cut query time by 40%+.
 - Tech: Node.js, ReactJS, MongoDB — deployed for multiple government department clients.
- Integrated OpenAI GPT-4 with Discord (Chat Discord GPT project) to deliver real-time AI Q&A for students, reducing manual instructor support load by 60% and enabling 24/7 instant responses.
- Contributed to frontend modules for Assignment Review and Q&A systems; collaborated closely with backend and QA teams to define API contracts, resolve production bugs, and optimize performance in Scrum/Agile workflows.

Backend Developer | ITSOL JSC

7/2020 – 12/2022

Enterprise software consultancy partnering with Viettel Cyber Security

Hanoi, Vietnam

- Built and maintained RESTful APIs, scheduled report pipelines, and ETL processes for enterprise clients — handling millions of records across Oracle and MySQL databases.
- Collaborated with Viettel Cyber Security to deliver secure backend modules, implementing authentication hardening and audit logging that passed security review on first submission.
- Improved backend business logic and re-engineered data flows, increasing system throughput by ~20% and cutting nightly batch run times from 3 hours to under 1 hour.

Skills & Personal Projects

AI & LLM: OpenAI API (GPT-4, Embeddings, Function Calling, Streaming), LangChain, Prompt Engineering, AI Chatbot Development, Workflow Automation, RAG pipelines

Programming Languages: JavaScript/TypeScript (ES6+), Python, Java, SQL

Frameworks & Tools: Node.js, Express, Next.js, React, Spring Boot, React Native, Docker, Nginx, Jenkins, Git, RabbitMQ, Kafka, WebSocket, Redis

Databases: MongoDB, MySQL, PostgreSQL, Redis, Oracle

Cloud & DevOps: AWS (EC2, S3), CI/CD (Jenkins/Docker), APIDog, Microservices architecture

Certifications: Java Essential Programming · Kanban Practitioner

Projects: NovaLink CRM (Node.js/MongoDB/RabbitMQ/AWS — 60% report automation, 500+ concurrent txns) · EduTrack Assessment Platform (Spring Boot/Kafka/Redis — 200% throughput gain, 10K+ concurrent users) · Taskcover (real-time SaaS, 99.9% uptime) · Chat Discord GPT (OpenAI + Discord integration)
